Ladies and Gentlemen:

Pursuant to the Administrative Rules of Montana, 16.2.604,
the following Preliminary Environmental Review has been prepared by the
Department of Health and Environmental Sciences concerning Lloyd D. Carr
d.b.a. Carr's Wrecking.

The purpose of the Preliminary Environmental Review is to inform
all interested governmental agencies, public groups or individuals of
the proposed action and to determine whether or not the action may have
a significant effect on the human environment. This Preliminary
Environmental Review will be circulated for a period of fifteen (15)
days at which time a decision will be made as to our future action.

If you care to comment on this proposed action, please do so within
the allotted time.

Recommendation concerning preparation of EIS Not Necessary

PER Prepared by: Thomas M. Ellerhoff

Date: January 7, 1986

General Comments

Carr's Wrecking proposes to establish a licensed wrecking facility at 917 Mineral Avenue, Libby, Montana (Lots 1,2,3,4,5,6 & 7 of Block 12, Pioneer Junction).

Lincoln County officials reviewed the proposal and indicated it was in accordance with local government zoning and ordinances.

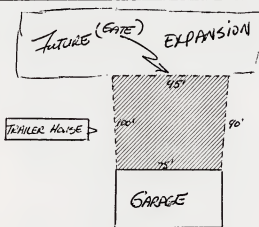

State law requires junk vehicles to be shielded from public view, which is a point six-feet above the centerline of any public road. The yard is enclosed on three sides by a wooden fence, with the fourth side shielded by the existing garage building. The shielding material consists of 1" x 8" roughcut boards. The fence supports consist of butt-treated posts with connecting stringers. Board spacing is no greater than 1.5". The gate for the facility is on the east-side fence.

Dear Ron,

My shielding plan for Carr's Wrecking is as follows:

1. The yard will be enclosed on three sides by a wooden fence measuring about 285 feet in length. The fourth side will be shielded by the existing garage building.
2. The shielding material will consist of roughcut 1" x 8" boards. The fence supports will be butt-treated posts with connecting stringers.
3. The fence height shall be of sufficient height to provide at least minimum visual shielding requirements from all three public roads in the area of the yard.
4. Board spacing will be no greater than 1½" when viewed straight on, or up to 45° angle from the fence face.
5. Gating will be provided on the rear wall, opposite the garage.

If you require additional information about my plans, please contact me.

Sincerely,

Lloyd Carr
